
ATTENTION FORRESTON WATER CUSTOMERS

Beginning in June 2020, the Village will be completing a water project including the replacement of approximately 6,255 feet of watermain with 4, 6, 8 and 10-inch polyvinyl chloride (PVC) watermain. The project also consists of replacing valves, water service connections, and fire hydrants; and providing traffic control and construction site restoration.

The total project is estimated to cost \$1,554,322.00 and is being financed with 30-year 1% loan from the Illinois Environmental Protection Agency's Public Water Supply Loan Program (PWSLP). The Village will also be securing \$800,000 in principal loan forgiveness from IEPA. The final loan amount the Village will have to pay back is estimated at \$741,592.00.

The Public Water State Revolving Fund (SRF) is administered by the Illinois Environmental Protection Agency (IEPA). A portion of the IEPA money to fund these types of projects comes from the US Environmental Protection Agency. SRF programs operate in each state to provide communities with the resources to build, maintain and improve the infrastructure that protects one of our most valuable resources: water.

The project will provide improved water service and water quality to the Village's water distribution system.
